

# ABLE™ RHD

RIGHT-HAND  
DRIVE VEHICLE

Perfect for Parking  
Enforcement and  
Public Works

The lithium powered, long-range ABLE XR™ RHD is the first vehicle that truly fills the gap between conventional low-speed vehicles (LSVs) and compact pickups and vans. With an extremely tight turning radius and maneuverable, the ABLE XR™ RHD is perfectly suited for parking enforcement and public works. It comes with safety and comfort features never before offered in the LSV classification. Built tough with automotive grade components, the ABLE XR™ RHD is no glorified golf cart, and with both a 13kWh or 26kWh lithium battery configurations available, and up to a 160-mile range\*, and 45+ mph capability, the ABLE XR™ RHD has the strength to go the distance.

With driver safety, a top priority, a load sensing ABS brake system, hill-hold feature, reinforced floors and doors, full-length steel chassis, and a driver side airbag are included as standard features of the ABLE XR™ RHD.

The lithium battery pack provides enough power for HVAC and license plate reading technology, and with an enclosed cab, drivers can stay comfortable all year round. Other standard comforts include Bluetooth phone connectivity and backup camera. The XR Chassis is also autonomous and telematics ready.

## PLATFORM

The ABLE™ XR is an incredibly versatile electric vehicle platform. Just as the real value of a smartphone is in how applications are utilized on the platform, the robust towing and payload capacities of the ABLE™ and ABLE™ XR, as well as the automotive grade components, make these platforms capable of supporting an endless number of applications that add value to the user.

## TOWING POWERHOUSE

The ABLE™ XR is perfect for any load, small or large, sporting a substantial payload capacity of 1100lbs on public roads, and 2000 lbs on private facilities and closed campuses. It is a towing powerhouse with a towing capacity of up to 2000 pounds on public roads, and up to 3000 pounds\*\* on closed campuses. The ABLE™ XR's electric drive system which enables it to pull effortlessly off-the-line, with an ultra-linear power delivery.

## NARROW AND NIMBLE

At 55 inches wide and with a 13 ft Turning radius, the ABLE™ XR can be safely navigated on sidewalks and walkways in addition to public roads.

\* at 25 mph. Does not include parasitic load. Power consuming features, accessories, along with driving conditions, will reduce vehicle range.  
\*\* Requires electric or surge trailer brakes.
